

# 15 minutes now, young stem cells forever.

Forever Labs stores your young, viable stem cells today, so that you can access them for use in future rejuvenation therapies and to fight age-related disease tomorrow.

1

Your doctor collects your stem cells in a simple 15 minute procedure.

2

Your cells are cryogenically frozen and safely stored in an FDA compliant clinical-grade biorepository.

3

You have lifetime access to a reservoir of young stem cells, that no longer age.
